TITLE : LIFTABLE STRETCHER

ABSTRACT : PROBLEM TO BE SOLVED: To enable a stretcher to be lifted even at a restricted corridor, with a wounded person or the like kept in an upright state, when a transport in a lifted condition is required, ensure the stretcher to be safely lifted, and allow a transport similar to the case of a normal stretcher for carriage in a horizontal state after lifting.

SOLUTION: A sheet 2 for a wounded person or the like to lie on is provided, and fitted with a head cover 4 and a foot cover 5. A plurality of belts 6 and belt fasteners 7 differently colored for identification are arranged on the sheet 2 for securing the body of the wounded person or the like thereto. In this case, the same color is applied to the belts 6 and the fastener 7 corresponding to each other, and sheet covers 8 are provided on the sides of the sheet 2 for covering the wounded person or the like. In addition, a plurality of carrying rod insertion holes 9 for inserting two carrying rods for the stretcher are formed at both right and left sides of the sheet 2.
